Career Summary

Sep 2018 - Present Application Engineer, Rakuten, Inc. (Tokyo)

Rakuten, Inc is a global company providing various online services, including bank and leisure services. As an application engineer in Rakuten, I was responsible to handle requests from the business units, implement the application based on the requirements, design test cases and test it in detail. The work required lots problem solving skills and teamwork.

Working with people with different backgrounds in a team of more than 6 people, I needed to adapt different work environment and approaches.

Jun - Oct 2017 Summer Internship Developer/ Part-time Web Developer, Mirum Hong Kong

Mirum Agency (Hong Kong) is a digital agency providing IT solution services. I was in charge of a medium-sized project as one of the main developers during the internship in a team of 6. After that, I was employed as a part-time web developer to continue support the project. During the internship, I needed to adapt the tight schedule and learn everything from scratch.

Other Experience

2017 - 2018 Organic Food Selling Mobile App, Final Year Project

My final year project in University was to build an organic food selling mobile application with 2 other schoolmates. Our group tailor-made a mobile app for a organic food farm in Hong Kong. We discussed the requirements, designed UI/UX, provided technical suggestions, implemented the mobile app and improved it based on the feedback from the farmers. We all participated in every steps of the development. I was particularly responsible for presentation.

Mar 2015 - Feb 2016 President, People's Campus Radio, HKUSTSU

People's Campus Radio is a student society in the Hong Kong University of Science and Technology, providing broadcasting opportunities orientation activities for our members.

I was responsible to organize and support various events for our society members, including event planning, marketing and execution. Moreover, as the president and a leader of the committee, I enabled our team to work effectively and efficiently by, for example, preparing and facilitating meetings.

It was a very precious experience to improve my time management and problem solving skills, since we needed to prepare everything by ourselves, meanwhile I was studying in the University and working for a part-time job.
